This manual contains the Standard Operating Guidelines for the Hazardous Materials Response Group of the Carver County Fire Departments.

The following Standard Operating Guidelines are for the safety and enrichment of the entire Hazardous Materials Response Group.

There is absolutely no warranty of any kind with regard to the written material and the author(s) shall not be held liable for errors contained herein or for incidental or consequential damages that may occur in connection with the use of this manual.

These Guidelines are not intended to be all-inclusive, but merely to provide standardized information to the Hazardous Materials Response Group.

As with any project of this scope, regular evaluation and revision are very important to continuing success. Comments, suggestions or ideas are welcome and may be sent to:

Scott Gerber, HMRG Coordinator  
Carver County Government Center, Administration Building  
600 East 4th St.  
Chaska, MN. 55318  
(612) 361-1527      (612) 361-1536 - Fax

# ADMINISTRATION

## The Regional Response Concept

The Carver County Fire Departments Hazardous Materials Response Group (Known here after as “HMRG”), is based on the concept that the Carver County Fire Department’s will control and maintain group members with advanced training and skills. This HMRG is a cooperative effort in order to reduce the costs for all participating Fire Department’s. These guidelines are invoked to protect the HMRG members as well as promote the Standard Operating Guidelines for hazardous materials incidents at all times.

## Authority and Authorization

The authority of the HMRG was established within the scope of the Carver County Mutual Aid Association. The HMRG shall operate as part of and under the terms of the Carver County Mutual Aid Association as approved by the authorities of each Carver County Fire Department. These Standard Operating Guidelines were developed and approved by the HMRG. Any recommended changes to these guidelines shall be forwarded in writing to the HMRG Coordinator. The HMRG Coordinator shall review these changes and/or corrections with the HMRG for incorporation in this manual. Each Fire Department and the Carver County Mutual Aid Association be notified of any and all changes.

## Participating Departments

All participating Carver County Fire Departments shall maintain a minimum competency for all their respective department members at a minimum of the Awareness Level as per the Standard for Professional Competence of Responders to Hazardous Materials Incidents, NFPA 472 as a minimum requirement.

## Mission Statement

To enhance the protection to the fire districts in Carver County and the citizens that they serve in the event of a hazardous materials emergency. To assist the State of Minnesota response teams working within our jurisdictions.

## Scope

The response of the HMRG will not take over Incident Command of any incident from the host fire department. The scope of the HMRG is to assist the incident commander and fulfill the requirements of the Hazardous Materials sector of the Incident Command System during a hazardous materials incident.

## Safety Statement

The objective of the HMRG is to safely mitigate a hazardous materials incident emergency, with the emphasis on safety.

## Requirements for Participating in the HMRG

All Carver County Fire Departments are affiliated with the HMRG; therefore, all fire department members are eligible to participate in the HMRG if they meet the following minimum requirements.

1. Members shall meet all the requirements of the individual Carver County Fire Department of which they are an active member and have approval from the departments Fire Chief.
2. Members of the HMRG shall have Hazardous Materials Operational training as defined in the Standard for Professional Competence of Responders to Hazardous Materials Incidents, NFPA 472 as a minimum requirement.

3. Members shall participate in HMRG training and meetings to maintain certifications and competencies in the functions and response of the group to remain eligible to participate.
4. Members who are not active members of a Carver County Fire Department shall meet all the requirements as outlined in item 2 and 3 above. These members shall be covered for workers' compensation through their respective employer while operating with the HMRG.
5. Any person who provides personnel and equipment to assist at the scene of a hazardous materials response incident outside the persons geographic jurisdiction or property, at the request of the local unit of government, is not liable for any civil damages resulting from acts or omissions in providing assistance, unless the person acts in willful and wanton or reckless manner in providing the assistance. MN Statute 299A.51
6. Any member wanting to join the HMRG must submit their request in writing to the HMRG Coordinator. Their request will be reviewed by the HMRG Coordinator and the officers of the HMRG. The HMRG Coordinator will also check references with the host fire department chief and training officer. The request will be acted upon by the group coordinator.

## **Membership**

The HMRG shall consist of a maximum 40 members.

## **Training**

1. All members shall operate within the HMRG at the level of their training following Standard for Professional Competence of Responders to Hazardous Materials Incidents, NFPA 472.
2. It shall be the responsibility of HMRG Coordinator or designee to maintain copies of each member's hazardous materials training records. All other training records shall be kept with the respective Fire Department. For Non-Fire Department members it shall be the responsibility of the HMRG Coordinator or designee to maintain all training records.
3. It shall be the responsibility of each members respective Fire Department for supplying and keeping updated the HMRG Coordinator each participating members training records and training level. For Non-Fire Department members it shall be the responsibility of the member.
4. It shall be the responsibility of each member's respective Fire Department to ensure that their respective members who are participating as members of the HMRG maintain their level of competency.
5. All members of the HMRG must attend at least 50% of the regularly scheduled meetings and training sessions scheduled by the HMRG.

## **Medical Surveillance/Physical Examinations**

1. All HMRG members who are trained to the Hazardous Materials Operational level shall meet the medical surveillance and respiratory protection requirements of their respective Fire Department. These records shall be maintained individually by each respective Fire Department. For Non-Fire Department members it shall be the responsibility of the HMRG Coordinator or designee. It shall be the responsibility of each members respective Fire Department for supplying and keeping updated the HMRG Coordinator each participating members training records and training level. For Non-Fire Department members it shall be the responsibility of the member.
2. All HMRG members who are trained to the Hazardous Materials Technician level or above shall meet the medical surveillance and respiratory protection requirements as defined by OSHA Regulation 1910.120. These records shall be maintained individually by each respective Fire Department. For Non-Fire

Department members it shall be the responsibility of the HMRG Coordinator or designee. It shall be the responsibility of each members respective Fire Department for supplying and keeping updated the HMRG Coordinator each participating members training records and training level. For Non-Fire Department members it shall be the responsibility of the member.

3. All HMRG members who respond to a Hazardous Materials Incident shall be given an on-scene medical surveillance. When using totally encapsulating suits, this shall consist of a "pre-suit" exam and a "post-suit" exam and any HMRG member who has been in the hot zone shall also be given a "post-suit" exam.

## **Coverage Area**

The HMRG was established to provide protection within the borders of the Carver County Fire Departments fire jurisdiction.

A Carver County Fire Department may use the team for extending mutual aid when the following guideline are followed:

1. The Fire Chief from the Carver County Fire Department or his/her designee, has responded to the scene to assess the situation.
2. The Fire Chief or his/her designee may activate the group to respond to an emergency outside of Carver County when the incident in the surrounding community threatens Carver County and/or the HMRG would be beneficial to mitigating an incident.
3. The Hazardous materials sector shall be established and controlled by the HMRG with a HMRG liaison person assigned within the command post.
4. The HMRG responding outside of Carver County must follow the guidelines stated to provide the control and safety necessary for the HMRG.

## **HMRG COORDINATOR**

The HMRG Coordinator is appointed by the HMRG and approved by the Carver County Mutual Aid Association. This individual shall perform the primary liaison function between the HMRG and the Carver County Mutual Aid Association.

The HMRG Coordinator manages the daily business of the project, interfaces with other agencies, and supervises all activities involving the project. The Coordinator attends meetings to advise the team and make recommendations. The Coordinator attends conferences and seminars to obtain information that will enhance the operations of the HMRG.

The HMRG Coordinator shall attend all the Carver County Mutual Aid Association meetings and shall keep the Association informed on the activities of the HMRG.

The HMRG Coordinator is responsible in assuring that the overall standards of the HMRG are met. The Coordinator periodically reviews all aspects of the HMRG and facilitates improvements as required.

The HMRG Coordinator is responsible for organizing, coordinating and/or recording the Debriefing, Post Incident Analysis and Critique of all incidents.

The HMRG Coordinator is responsible to make sure that all supplies used are replenished and/or that all monetary costs are reimbursed when and where appropriate.

## **FIRE DEPARTMENT REPRESENTATIVE**

Each Fire Department Fire Chief shall appoint a Department Representative as the contact for the HMRG. This individual shall attend meetings of the HMRG and keep their respective Fire Department abreast of the HMRG activities.

## **IDENTIFICATION CARD**

Every member in the HMRG shall have a special identification card issued to them. Upon arrival at the scene of an incident, each team member will report in person and be checked in by the Safety Officer or someone delegated this responsibility.

## **IDENTIFICATION VESTS**

All HMRG members shall wear identification vests at all incidents identifying them as HMRG members.

## **INCIDENT COMMAND**

The Fire Department, having jurisdiction over the incident, shall establish and maintain total scene incident command.

## **MITIGATING THE INCIDENT**

Generally it will be the HMRG who will do the actual hands-on containment of materials at an incident.

It is the primary goal of all concerned when dealing with hazardous materials to isolate, contain, neutralize (or stabilize) the material when possible and incident clean-up when appropriate. All available specialized tools, equipment and apparatus should be used to provide maximum protection and efficiency for all those who will be working to mitigate the incident. For further detailed information refer to Appendix 1.

## **REPORTING**

MFIRS HAZMAT forms should be used for all hazardous material responses. Reports of all responses will be written by the HMRG Group. All Final reports will be kept with the HMRG Coordinator or designee. See Appendix 1 for additional reporting information.

## **SAFETY**

The HMRG Members operating at all incidents should operate within all safety guidelines and safety practices at all times following the appropriate operating procedures.

## **MEDICAL TRANSPORTATION**

An ALS ambulance shall be on scene and available at all times during a Hazardous Materials Incident.

## **APPENDIX 1**

# **RECEIPT OF CALL INCIDENT COMMAND**

## **GUIDE FOR INITIAL STRATEGY DECISION**

### **GOING INTO SERVICE**

Request dispatcher to advise you of wind direction and velocity.

Is your normal route to the scene going to be safe?

Don't approach the scene down wind or down grade from the spill or leak.

### **ARRIVAL AT SCENE**

Before arrival, advise incoming units of route to take if normal approach route is unsafe.

Announce by radio:

1. Your size up (what do you see?)
2. Your location
3. Who's in command

Stage all other units until you've decided on a strategy.

### **ORGANIZE THE INCIDENT**

Ask one of your crew members to designate sector officers. Use the form "Command Checklist". Assign a DOCUMENTATION OFFICER to list all activities and equipment used.

### **MAKE INITIAL STRATEGY DECISION**

## GUIDE FOR INITIAL STRATEGY DECISION

### ARE PEOPLE IN IMMEDIATE DANGER?

Delegate to your Science Officer the responsibility to identify the product, and advise you of the harm level and area affected from the leak/spill.

If there is an immediate danger to people, then:

- Delegate to your Hazard Sector Officer the task of evacuating people in the threat zone.
- Delegate to your Hazard Sector Safety Officer the responsibility to advise all responders of the level of protection they need during the evacuation.
- Delegate to Law Enforcement the responsibility to secure the evacuated area from re-entry by civilians.
- Delegate to your EMS Officer the responsibility to set up an area for evacuees to be gathered for medical follow up and identification.
- Delegate to your Decontamination Officer the responsibility to set up “decon” areas for exposed first responders and for contaminated evacuees.
- Advise your Staging Officer and Public Information Officer to begin their responsibilities that are outlined in the manuals.
- Advise Carver County Environmental about the situation and have them respond or begin their responsibilities.

## GUIDE FOR INITIAL STRATEGY DECISION

## **IS PROPERTY AND/OR THE ENVIRONMENT OUR ONLY CONCERN?**

**Delegate to your Science Officer the responsibility to identify the product, and advise you of the harm level and area affected from the leak/spill.**

- **Delegate to your Hazard Sector Officer the responsibility to develop a defensive action plan, which will stop the product's migration.**
- **Delegate to your Hazard Sector Safety Officer the responsibility to keep all responders out of the threat area, to wear the required level of personal protective gear, and to monitor all operational activities for safety.**
- **Delegate to Law Enforcement the responsibility to deny access to the area by civilians.**
- **Delegate to your EMS Officer the responsibility to set up an area for medical monitoring in the event of an accidental exposure, or a medical emergency.**
- **Delegate to your Decontamination Officer the responsibility to set up a "decon" area(s) in the event of an accidental exposure to a first responders or civilian.**
- **Advise your Public Information Officer to obtain all relevant information that may be requested by the media and other agencies.**
- **Advise Carver County Environmental about the situation and have them respond or begin their responsibilities.**

Guides For the Incident Commander

**\* Put on a reflectorized vest.**

- \* **Work from a command post.**
- \* **Use a communication officer.**
- \* **Be sure all personnel are briefed on the health threats of the product and the medical signs and symptoms from exposure.**
- \* **Approve Sector Officers plans for accomplishing their assigned objectives.**
- \* **Be sure all Sector Officers are briefed on the Site Safety Plan for the mitigation of the incident.**
- \* **DO NOT allow personnel to enter a chemical contaminated area unless they're trained to the technician level, are properly equipped and all support sectors are operational.**

# **HAZARD SECTOR OFFICER**

## **HAZARD SECTOR OFFICER**

- 1. Put on a reflectorized vest.**
- 2. Obtain a portable radio and contact the Communication Officer for radio channel assignment.**
- 3. Contact the Science Officer and review the Product Information Worksheet. Review the types of mitigation techniques.**
- 4. Once the Science Officer has completed their sheet and a method for controlling the spill is decided, then:**
  - \* Decide on the actions the personnel can safely conduct with the personnel protective equipment that the group has.**
  - \* Review the “Site Safety Plan” and “Action Plans” with the I.C. and all Sector Officers.**
  - \* When all support sectors are ready then implement the plan. Be sure to constantly review the plan to ensure that there are no deviations with out prior notice.**
- 5. If you use an “Entry Team”, they’ll need a radio channel which is not being used by others during the operation.**
- 6. Specific support sectors you need to be closely involved with are:**
  - \* EMS needs to do pre and post medical evaluations of all personnel in the “Hot Zone”.**
  - \* Decontamination is set up and personnel are ready.**
  - \* The Science Officer has briefed you on the chemical and the level of Personnel Protective Equipment (PPE) required.**
  - \* Hazard Sector Safety Officer is monitoring the incident.**
  - \* All entry personnel know and understand any hand signals that could be used.**
- 7. Be sure that your personnel have been briefed on the signs and symptoms of an exposure.**

**HAZARD SECTOR SAFETY OFFICER**

## **HAZARD SECTOR SAFETY OFFICER**

- 1. Put on a reflectorized vest.**
- 2. Get a portable radio and check with the Communications officer for radio channel assignment.**
- 3. You have the responsibility to identify any unsafe activity or condition within the hazard area and report it immediately to the I.C.**
- 4. Complete the Site Safety worksheets in this book. Be sure that all sectors have signed the site safety plan before any mitigation activities have taken place.**
- 5. Be sure that all personnel have been briefed on the health hazards of the spilled product and the signs and symptoms of an exposure.**
- 6. Be sure that the air monitoring sector is aware of the health hazards and the chemicals critical numbers. Use the sheet “Right to Know” in this book.**

**IN ALL EVENTS, DON'T LET ANYONE GET HURT!**

# **EMS OFFICER**

**EMS OFFICER**

- 1. Put on a reflectorized vest.**
- 2. Contact the Communication Officer for radio channel assignment.**
- 3. Coordinate or set up the following areas:**
  - \* Triage area for contaminated victims. Let the I.C. know where the triage area is located.**
  - \* Set up a stand by ALS crew for the Haz-Mat response personnel.**
- 4. Set up an EMS station at decontamination.**
- 5. A “pre- entry” and “decon exit” medical survey must be done for all personnel who enter the “Hot zone”, and all other responders who could have been exposed to the product. See the forms in this book**

# **SCIENCE OFFICER**

## **SCIENCE OFFICER**

Enclosed in this book are the required forms that need to be completed before any mitigation can take place. The air monitoring team(s) will need to know some information as to the critical numbers regarding the spilled product.

**\* Product Information Worksheet**

**\* Resource agencies which can help you**

- State of Minnesota CAT & ER teams
- Chemtrec
- Resource manuals located at the command desk in 216.

**\* Reference sheets you should acquire:**

- DOT Placard Number
- Product Name
- Material Safety Data Sheets (MSDS)
- Shipping Papers
- Railroad Waybill
- Bill of Lading
- Hazardous Materials Definitions

# **DECONTAMINATION OFFICER**

**DECONTAMINATION OFFICER**

- 1. Put on the decontamination reflectorized vest.**
- 2. Obtain a portable radio and contact the Communications Officer for radio channel assignment.**
- 3. Obtain from the Science Officer the following information:**
  - \* Level of Personnel Protective Equipment (PPE).**
  - \* Type of decontamination needed. Wet or Dry, see attached sheets**
  - \* Contact the Hazard Sector Officer for the location of the decon station.**
  - \* Product information, health hazards and signs and symptoms of an exposure.**
- 4. Request that the EMS Sector complete medical evaluations of all decontamination personnel.**
- 5. Brief the decontamination personnel on the health hazards of the spilled chemical and the signs and symptoms of an exposure.**
